Evidence-based education is related to evidence-based teaching, evidence-based learning, and school effectiveness research.

Curriculum

- Standards are what students need to learn.
- Curriculum is the approach educators take to ensure students meet the standard.

The Learning School American Diploma program will observe American style education approaches which focus on student needs and talents. We will observe the Common Core standards and Next Generation Science standards.

The core instructional deliver focuses on what the students do.

Teachers will adjust their instruction accordingly.

The teacher models and facilitates not lectures and dictates.

Learning profiling is the foundation for assuring teachers know their students' wants, needs and expectations.

As a result, every student will be continuously assessed and profiled to ensure student achievement.

Every teacher develops an individual learning plan (IEP) for every student.

The School Improvement Team (SIT) reviews every IEP for accuracy, appropriateness and feasibility.

Parents will meet with the SIT to discuss the IEP one month after enrollment.

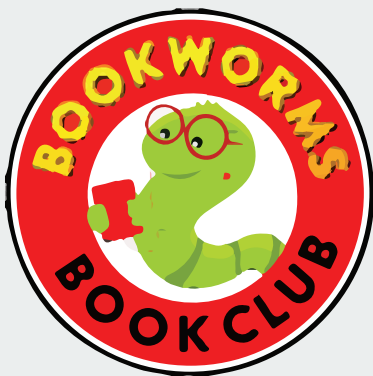

This approach is how we ensure students' wants, needs and expectations are guaranteed.
